

THAMES VALLEY CRICKET LEAGUE

Established in 1972, The Morrants Thames Valley Cricket League is an important component of the ECB Premier League structure

TVCL FAIR PLAY AWARD

The First Placed Club shall receive the Rod Dye Fair Play Trophy and £1,000 prize money. Runners-up shall also receive a cash prize as per the table.

Position	1st	2nd	3rd	4th	5th	6 th to 10th
Prize	£1,000	£750	£500	£250	£150	£100

The Total Prize money pot will be £3,150.

In the event that Clubs are tied for a position, then the value of the positions will be shared e.g. 2 Clubs are Tied 4th place – they would receive £200 each (250+150/2)

The Prize Winners will be announced at the AGM in November.

Calculation Method

Captains mark their opposition Team with a score from 10 to 1.

The Total Marks received during the Season (less any penalties for forfeits) divided by the Number of games played gives the individual Team Average.

Forfeits: If a team forfeits a match then it will be given a mark of 7 (if it notifies the opposition and reports the result on TVCL16 before the cut-off time set out in Match Rule 12.5) or 4 (if does not).

Aggregation

These Team based Captains marking results will then be aggregated at Club Level divided by the Number of Teams* to provide a Club Average.

In addition to the Club Average, this will be combined with a Divisional Ranking. The highest "Fair Play" Marked Team in a Division will receive 10 points, down to 10th place receiving 1 point. The Divisional Ranking Points are then aggregated at Club Level, and then divided by the Number of Teams*.

The Number of Teams, has an adjustment applied based on a probability factor of receiving the highest marks across multiple teams.

Number of Teams	1	2	3	4	5	6
Adjusted Probability Factor	1	1.89	2.78	3.67	4.56	5.45

The Clubs are then Ranked by their Club Average and the separate Divisional Ranking Average. These two rankings are then combined to provide a Combined Ranking Average.

Where two or more Clubs have the same Combined Ranking Average, then the best Club Average is used as the differentiator.
